

SAP Lead Interface & Analyst

About Us:

Apriori Ressources Humaines inc. is a consultant firm specialized in the recruitment of IT professionals. Our unique approach is based on the quality of our interventions and our network of contacts in the IT industry. We value openness in all interactions and our interviews are conducted so we may properly understand your career path. We represent our clients and candidates with pride, integrity and transparency. **As a matter of fact, our goal is simple:** pair qualifications and career opportunities by creating lasting relationships and meeting all parties' expectations.

Our Client:

In total, our client, its divisions and subsidiaries employ more than 2,200 people in Quebec, Ontario, Western Labrador and the Atlantic provinces. You will be a member of the SAP Implementation Team (multi-modules) in your area of expertise. Our client offers a pension fund, excellent group benefits, a generous base salary as well as a special incentive earnings program which will be explained in details during your interview with us. The total remuneration package will surpass your expectations. Upon completion of the implementation (in approximately 2 years), the "New Dimension" tools will be attached to different modules, thereby enhancing the long-term challenge. You will not find a more exciting SAP career challenge in Montreal. Our client is offering you a great career opportunity.

Job Summary:

The successful candidate will be responsible for the SAP PI interfaces across the enterprise landscape. As a key member of the COE interface team, the candidate will be responsible for defining, configuring and monitoring PI interfaces to align with our client's SAP goals and standards. The candidate will be responsible for working with the process teams and 3rd party implementation partners on the PI interface requirements, development and configuration in order to meet functional interface requirements. The candidate will also be the central contact for PI administration, monitoring and troubleshooting.

Key Responsibilities:

- Responsible for designing, recommending, planning, developing, and implementing solutions to meet client requirements
- Accountable for the successful completion of assigned projects and tasks, along with leading projects and task teams.
- PI Application Monitoring

- Ensure PI standards are followed - Governance and quality assurance - Compliance with company's IT processes
- Implement and configure the architecture defined by the PI Architect
- Perform System Configuration of SAP PI (installation, configuration of Web AS, ...)
- System Management (User Management, Exchange Profile Maintenance,...)
- Security Operations (e.g. handling of certificates)
- Main point of contact into the PI team in questions of integration from outside
- Creation of PI technical designs for integration scenario requirements
- Development in Enterprise Services Repository
- Configuration in Integration Builder
- Writing technical documentation
- Monitor message processing and message throughput
- Troubleshooting and status tracking of messages
- Error and alert handling
- Root-cause analysis

Required Knowledge, Skills and Experience:

- University Graduate in Computer Science, MIS or related field (or equivalent experience)
- A minimum of 4+ years of SAP Basis PI administration experience in ERP 6.0 or above
- At least 2 full life cycle implementations including exposure to at least one complete life-cycle implementation with PI 7.0, 7.1
- Skilled in PI Administration features (RWB, Monitoring, Alerting & Administration)
- Experience with core and non-core adapters
- Experience with ABAP and JAVA Stacks
- Administer system performance, Key Performance Indicators, (CCMS, PI/XI PMI/RWB)
- Ability to handle a pipeline of numerous tickets, in terms of prioritization, categorization between break-fix and enhancements, etc.
- Knowledge of interfaces supporting such as IDOC, ALE or third party middleware products
- Ability to work closely with clients to find solutions and identify technical process improvements. Ability to analyze technical needs and identify gaps and alternative solutions relative to existing design.
- Ability to evaluate impact of technical configuration or process changes across SAP components and landscapes
- Ability to resolve PI configuration and technical issues across landscapes/SAP components
- Ability to write detailed system specifications to support the requirements as well as document as-is system solution
- Ability to work closely with clients to find solutions and identify technical or business process improvements
- Strong French and English communication skills, both written and verbal, and strong interpersonal skills
- Strong analytical and problem solving skills, with the ability to multi-task
- Demonstrated ability to work in a collaborative team environment
